

HOW TO CARE FOR AND MAINTAIN YOUR REVIVIFY COATING

REVIVIFY
AUSTRALIA

Automated Car Washes

Do not use any automated car wash with brushes, the brushes in these car wash are overly abrasive and they cause extreme wearing on the coating. Touchless car washes are allowed, but do not purchase any after-wash “coating” options such as “spray-wax”.

Washing

- Use PH Neutral car shampoo and “2 Buckets Wash Method” or using Waterless cleaning solutions with microfiber towels.
- For optimal performance, the vehicle should be washed semi-monthly to prevent excessive build-up of contaminants on the surfaces.
- Do not wash the vehicle in direct sunlight as it may cause streaking and water spots to appear.
- Wash the vehicle from top to bottom, cleaning the heavy contaminated areas last.
- Always utilize another set of mitt or sponge for the vehicle’s wheels.

Drying

- Always dry vehicle with high quality microfiber towels, and if possible avoid leaving it to dry under direct sunlight. This will reduce and minimize the risk of water spot etching
- Never apply pressure when drying the vehicle with microfiber towels, allow the towel to absorb to moisture from the surfaces.

Stain and Spot Removal

- Do not use aggressive/abrasive products to polish the surfaces in order to remove stains and spots.
- Do not use excessive pressure to remove stains and spots.
- Bug Splatter, Tree Sap, Bird droppings etc. should be cleaned off as quickly as possible to minimize staining to the surfaces.

Leather Care

- Leather surfaces should be cleaned semi-monthly to prevent excessive build-up of contaminants on the surfaces.
- For any spills onto leather, wipe off the contents as quickly as possible to prevent stains.

Annual Inspections

Annual Inspection is recommended as it ensures the REVIVIFY coating product is maintained properly and to ensure maximum performance and longevity. Annual Inspections are carried out by your Approved Applicator, within 30 days prior to annual due date from the initial installation or the last Annual Inspection. If the vehicle requires cleaning for the purpose of the inspection, the costs associated will be the responsibility of the vehicle owner.
